

Sociology Survey

For this project, you will be creating a survey to give to the students at McGuinness. The survey can be about anything that you want, as long as it gets approved through the teacher first. You will propose a topic, create a draft survey, give that survey to the class as a pilot, refine, and give the final survey to a total of twenty McGuinness students.

1. Proposal (topic)

- a. Get in a group with up to four total people
- b. Come up with a topic, write it down on a piece of paper with your group members' names, and give it to the teacher for approval

2. First Draft Survey

- a. *At least* two demographic questions
- b. *At least* one open-ended response question
- c. *At least* four closed-ended question, *at least* one of which must be Likert (with appropriate labels)
- d. Identify your target population (not included on final survey)
 - i. Tell me how you plan to gather your sample, and which method of random assignment that you will use

3. Second Draft Survey

- a. TYPED and visually clean copy of survey satisfying the above criteria

4. Pilot Data

- a. Print four copies of second draft survey and give them to the class
- b. Freehand draw visual results from your survey (using *at least* one percentage number, and *at least one* graph)

5. Final Survey

- a. After pilot modifications are made, you will give your final survey to twenty students at McGuinness

6. Results (visual representation of your survey results)

- a. In one poster or paper, you will visually represent your findings, which must include:
 - i. At least one percentage result
 - ii. At least one bar graph result
 - iii. At least one pie graph result
 - iv. Representation of open-ended responses
